

Mesfin Genie

Senior Lecturer in Health Economics, Newcastle Business School, The University of Newcastle

mesfin.genie@newcastle.edu.au mesfingenie.com ORCID 0000-0002-1744-4666 Google Scholar

Profile

Health economist working on preference measurement: what people are willing to trade in healthcare, how reliably it can be measured, and what happens to the measurement when respondents have not read everything put in front of them. Combines discrete choice experiments with eye tracking and applied econometrics, and builds the results into decision-support tools used by policymakers. 44 publications across the Journal of Health Economics, Health Economics, Social Science & Medicine, Value in Health and npj Vaccines.

Appointments

2026–	Senior Lecturer in Health Economics Newcastle Business School, The University of Newcastle, Australia. Continuing.
2023–2025	Lecturer in Health Economics Newcastle Business School, The University of Newcastle, Australia.
2023–2024	Health Measurement and Regulatory Science Fellow School of Medicine, Duke University, United States.
2022–2023	Postdoctoral Research Fellow Harrison School of Pharmacy, Auburn University, United States.
2020–2022	Research Fellow Health Economics Research Unit, University of Aberdeen, United Kingdom.
2019–2020	Postdoctoral Research Fellow Department of Economics, Ca' Foscari University of Venice, Italy.

Education

2019	PhD, Economics Ca' Foscari University of Venice. Stated-preference methods for healthcare decision-making.
2015	MSc, Health Economics and Management University of Bologna. MSc, Economics Addis Ababa University. BA, Economics Jimma University.

Selected publications

1. Genie MG, Watson V, Schwarzing M, Luchini S (2026). Fit for purpose? Assessing the robustness of discrete choice experiment designs in the context of evolving health technologies. *Social Science & Medicine* 404, 119463.
2. Genie MG, Reed SD, Ozdemir S (2026). Guidance or misdirection? Unpacking the role of feedback in health preference assessments. *Health Economics* 35, 910–928.
3. Martinenghi FI, ... Genie M, Attwell K, Blyth CC (2026). An open repository of COVID-19 vaccine mandate studies with a worked scoping review of quasi-experimental evidence. *npj Vaccines* 11, 01454.
4. Genie MG, Ngorsuraches S (2026). Priority for self or others? Incorporating equity considerations in a preference-based health value assessment. *Value in Health* 29, 467–475.
5. Genie MG, Boyes AW, Paolucci F (2026). Feeling lonely? Preferences for support programmes to reduce loneliness among older adults in Australia. *Health Policy* 167, 105587.
6. Attema AE, Antonini M, Genie M, Torbica A, Paolucci F (2026). Time preferences and COVID-19 vaccination uptake. *European Journal of Health Economics* 27, 47–63.
7. Genie MG, Poudel N, Paolucci F, Ngorsuraches S (2024). Choice consistency in discrete choice experiments: does numeracy skill matter? *Value in Health* 27, 1594–1604.
8. Genie MG, Ryan M, Krucien N (2023). Keeping an eye on cost: what can eye tracking tell us about attention to cost information in discrete choice experiments? *Health Economics* 32, 1101–1119.
9. Genie MG, Krucien N, Ryan M (2021). Weighting or aggregating? Investigating information processing in multi-attribute choices. *Health Economics* 30, 1291–1305.
10. Genie MG, Nicolò A, Pasini G (2020). The role of heterogeneity of patients' preferences in kidney transplantation. *Journal of Health Economics* 72, 102331.

Grants

2023–2025	MandEval, Medical Research Future Fund Effectiveness and consequences of Australia's COVID-19 vaccine mandates. MRF2019107. Programme A\$4,754,183; University of Newcastle allocation A\$808,440. Investigator.
2025	World Bank Group, IBRD Business case for upscaling Field Epidemiology Training Programmes in India. \$416,000.
2019	American Society of Health Economists travel award, with the NIA-funded Center on the Demography and Economics of Health and Aging, Stanford University.

Decision-support tools

eMANDEVAL	Comparing vaccine mandate designs on predicted public support, health outcomes and cost.
STEPS	Planning Field Epidemiology Training Programme scale-up in India, with the World Bank.
SOIL CRC BCA	Benefit-cost appraisal for soil and farming interventions. Project lead: Dr Frank Wogbe Agbola.

Teaching

ECON3111	Behavioural Economics. Lecturer and Course Coordinator.
ECON2112	Health Economics and Finance. Lecturer and Course Coordinator.
ECON3011	Introduction to Health Economics and Finance. Primary Course Coordinator.

Supervision

Four current PhD candidates, on telehealth use in Australia, climate change and agriculture in the Solomon Islands, crop drought resilience, and menopause and female labour market participation. One PhD completed 2025 on health systems reform, equity and efficiency. Two MPhil students completed on the impacts of COVID-19 and influenza vaccine mandates.

Service

Guest Editor, *Health Policy and Technology*. Reviewer for the *Journal of Health Economics*, *Health Economics*, *Value in Health*, *Social Science & Medicine*, *Journal of Choice Modelling*, *Theory and Decision* and *BMJ Open*.
